# Push-to-connect fittings for potable water systems

AquaLock™ by Watts offers the most flexibility and superior performance with no tools. Whether your tubing is PEX, copper, or CPVC, AquaLock has you covered with a stainless steel gripper ring that is resistant to corrosion and interlocks with multiple materials without any tools. Those who know best know when you need a connection you can count on... AquaLock it Down.

## Best performance in the industry:

Brass 200psi @ 200°F  
Mini 150psi @ 70°F  
Plastic 250psi @ 75°F

## The most flexibility for ease of installation:

- **No tools required**—connect and disconnect without tools for easy and flexible installation
- **Locking clip**—for extra connection security.
- **NO flow restriction**—no pipe stiffeners for copper and CPVC pipes allows for full flow without additional head losses.
- **Rotate under pressure**—for Brass, Mini, and Plastic fittings.
- **Zero-leak patented O-ring guide for Plastic Series**—protects the O-ring from damage during connection, helps align the tubing with the O-ring every time, and prevents the O-ring from becoming dislodged.

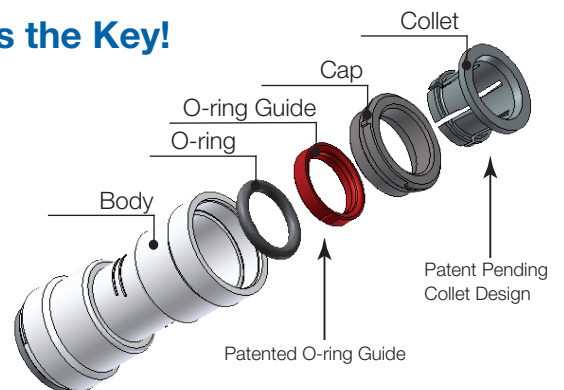

## Seal the Deal

Our patented O-ring guide ensures zero-leak connections by protecting the O-ring from damage, increasing side load capacity, and aligning the tubing properly every time.

## O-ring Guide is the Key!
