

# Durawatt®

## Electric Storage Water Heater

Durawatt provides a durable and energy efficient water heating solution, designed for reliability and simplified, cost-efficient maintenance. This emission-free, fully electric water heater is an ideal choice to meet local codes and regulations regarding decarbonization and electrification effectively.

### Effectively Comply with Codes

Durawatt burns no fossil fuels and is 100% electric to meet most building electrification and decarbonization requirements.

### 25-Year Warranty for Greater Peace of Mind

Designed for reliable operation and greater durability for a lower cost of ownership, backed by an industry-leading warranty.

### Match it to Your Specific Needs

Customize Durawatt to match site-specific needs, including greater KW input, larger tank, dual fuel, water conditions etc.

## Product Features

- Up to 98% thermal efficiency
- 18kW to 144kW input (~60-490 MBH)\*
- Storage: 150 to 750 gallons\*
- Incoloy sheathed heating elements
- Supply voltages: 208/240/380/480/600V
- Modbus operating controls
- Corrosion protection with AquaPLEX
- Industry-leading warranty (25 years)

\*Higher KW and bigger tank sizes available.

**AquaPLEX®**  
Engineered Duplex Alloy

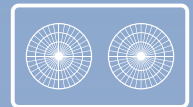

## Multiple Application Types

Fully Electric  
Heating Plant

Hybrid System  
with Gas Units

Backup for  
Heat Pump

- Meets ASHRAE 90.1-2010
- Eligible for LEED certification
- ETL listed to ANSI/CSA safety standards
- FM compliant
