Don't Let a Leak Turn Into a Disaster

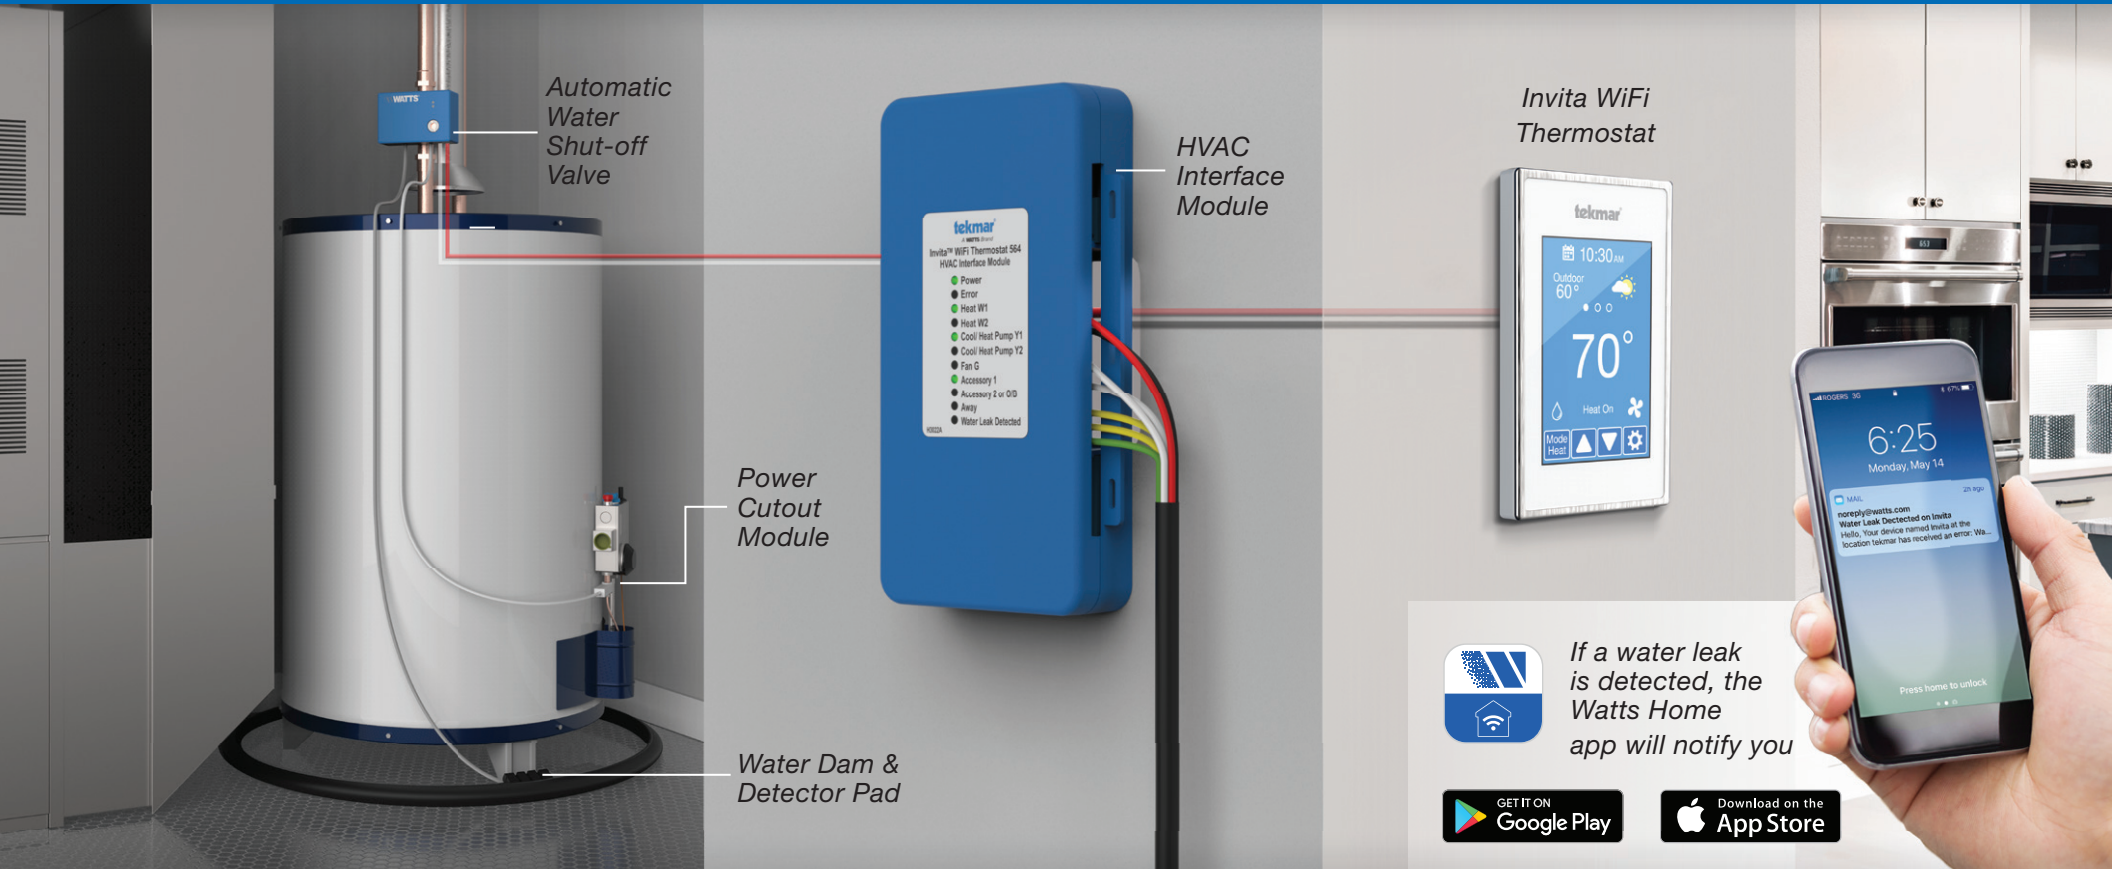

Connect a Watts FloodSafe® Water Detector Shutoff to Your Invita™ WiFi Thermostat.

Peace of Mind

Pair your Invita™ WiFi Thermostat with a Watts FloodSafe® Water Detector Shutoff to help protect your home from catastrophic damage due to a water heater leak.

Protect Against Catastrophic Water Damage

The Floodsafe® Water Detector Shutoff (LFWDS) automatically shuts off the water and energy supply to your water heater if a leak is detected. Because the Watts Home app sends a notification to your mobile phone to notify you, repairs can be arranged without delay.

Floodsafe Water Detector Shutoff (LFWDS) Features

- Easily installed on new or existing water heaters
- Sized for 3/4" or 1" supply lines
- Automatic water detection technology
- Provides contacts for monitored alarm detection systems
- Power Cutout Modules for the standing pilot gas fired water heaters retain thermocouple circuit in the event of momentary power outage

Testable and Resettable

This is NOT a one-time use device. The FloodSafe® Water Detector Shutoff can be easily reset by the contractor, home or business owner or plumbing inspector to assure proper operation.
